Achieving Gender Equality in Australia's Honour Awards

Increasing visibility and recognition for the invaluable work of women in our society, economy and community has never been more important. Despite recent progress, 28 of 31 Australian Honour Award categories in 2019 had more male than female nominees, with no women in 4 categories.

Be inspired by the fascinating career journeys of our 2 speakers, that have improved people's lives through education, radiology, nuclear medicine and music. Join our virtual conversation to explore how we can all help narrow the gap to achieve equal recognition of women in Australia's Honour Awards.
